

## Accessing Cafeteria Food and Beverages During COVID-19

Employees (internal and external to the site) who self-screen and declare they are able to present to the facility for work, are permitted to enter the cafeteria while maintaining proper hand hygiene and physical distancing.

Visitors will follow current provincial and facility guidelines regarding access within the facility.

Encourage visitors to bring their own snacks in the event the cafeteria is closed or vending is not available.

Take out is available if cafeteria seating is at maximum capacity.

The following practices are required:

- Hand Hygiene to be performed prior to using a vending machine or entering the cafeteria by using hand sanitizer
- All people to practice physical distancing – 6 feet (2 meters apart)
- Replace salad bar with individually portioned and wrapped salad plates
- Individually wrap muffins, cinnamon buns, baking, etc.
- Individually wrap cutlery or Nutrition and Food Services to provide to customers directly
- Remove tongs
- Nutrition and Food Services staff serve soup instead of self-serve stations
- Capacity in the dining rooms follows the current provincial guidelines
- Provide bagged lunches for dialysis patients and deliver them to the dialysis unit as per Manitoba Renal Recommendations
- Change sanitation buckets every hour or use test strips to ensure proper sanitizing strength
- Wipe commonly touched areas with sanitizing solution more often
