

Staff Screening – Self Isolate

Attention: Staff Member

You have not passed today's staff screening and are directed to:

- notify your department/site and then your manager and local Infection Prevention & Control provider as soon as possible,
- Self-isolate until advised otherwise and
- Maintain physical distancing from individuals within your home, engage in frequent hand washing and proper coughing etiquette.

Staff must stay home when sick, even if symptoms are mild. We all have a duty to protect our patients, our colleagues and our community.

Please self-monitor for symptoms including fever or chills, a new cough or increase in the amount of coughing, sore throat, shortness of breath, headache or unusual headache or sore muscles not related to overexertion or exercise.

You will be contacted and provided further direction.

Information on self-isolation can be found here:
